

Bangladesh Faecal Sludge Management Network is a common and collective platform for the sector actors to generate ideas, share views, influence policy and practice, and raise a collective voice to meet the challenges of sanitation sector

VISION

Ensuring a safe and sustainable faecal sludge management system in Bangladesh for improved public health and living environment for all by 2030

MISSION

To act as a knowledge and advocacy platform where FSM is an intermediary solution for influencing policy and changes in practice for access to adequate, equitable and improved sanitation

MAJOR OBJECTIVES

To work in a collaborative learning approach with all stakeholders to capture evidence, communicate knowledge and facilitate sectoral capacity building

To engage and provide strategic guidance to FSM stakeholders for advancing appropriate technologies and approaches for safe and sustainable management of faecal sludge

ACTIVITIES

First National FSM Convention took place in December 2016 with participation from more than 55 organisations representing Govt., NGOs, Academia and Private Sectors to capture evidence, communicate knowledge & build sectoral capacity.

Third FSM Convention, held in October 2018, aimed at finding the way forward for sharing experiences in policy influencing and promoting the business of faecal sludge. The convention focused on resource mobilisation for ensuring and scaling up sustainable FSM services in Bangladesh.

launching of

INSTITUTIONAL AND REGULATORY FRAMEWORK FOR FAECAL SLUDGE MANAGEMENT (IRF-FSM)

IRF-FSM, launched in November 2017, was a timely step of the Local Government Division to guide Department of Public Health Engineering, Water and Sewerage Authorities, City Authorities, NGOs, and especially local government institutions playing the central role, for ensuring proper treatment and disposal of human excreta.

2016 | 2017 | 2018

3 NATIONAL CONVENTIONS FOR THE PIT-EMPTIERS IN BANGLADESH

All the conventions were organised to discuss the rights, dignity, health and safety of the pit-emptiers and convey those to the policy makers.

150+ pit-emptiers participated the 3rd Convention in December 2018 from 20 municipalities and demanded for standard certification and registration system to mainstream sanitation service enterprises.

INFLUENCE AT POLICY LEVEL

Realising the needs for health, safety and dignity of the workers, LGD issued a circular to enlist cleaning workers in LGIs and train them preferably by DPHE on health and safety needs. DPHE is in the process of finalising the training manual for workers

INFLUENCE AT PRACTICE LEVEL

- Dhaka WASA is developing a Sewerage Master Plan highlighting FSM and considering to incorporate FSM in their ongoing projects
- Fertiliser companies are being interested to use faecal sludge as raw materials, and equipment manufacturing companies are now trying to manufacture sludge collection and transporters locally
